PROFILE

Passionate about crafting seamless web experiences with clean, efficient code. Adept at debugging, optimizing systems, and delivering scalable solutions.

WORK EXPERIENCE

Junior Developer

Zuri Labs Africa   01/2025 - Present.

- Led project tasks via Trello, fixing critical bugs and improving system stability.
- Developed RESTful APIs with Laravel, ensuring seamless frontend-backend integration.
- Built dynamic UIs using React & Next.js, optimizing performance and responsiveness.
- Collaborated in Agile teams to deploy scalable web apps following best practices.
- Debugged and refactored legacy code.
- Managing feature implementation and bug fixes.
- Developed RESTful APIs using Laravel, ensuring robust and secure backend services.
- Integrated third-party APIs and improved app performance by debugging complex issues.

PROJECTS

CakeShop – E-Commerce Platform

- Developed a full-featured e-commerce platform specializing in cake sales, enabling seamless product browsing, cart management, and checkout.
- Implemented responsive UI/UX design, secure payment integration, and inventory management for an optimal customer experience.
- Built with modern web technologies to ensure scalability and performance.

Premium Thrifts – Online Thrift Store

- Created an e-commerce website for high-quality thrifted clothing and footwear, featuring product listings, user authentication, and order processing.
- Designed an intuitive interface with search and filtering capabilities to enhance user engagement.
- Integrated secure payment gateways and optimized backend operations for smooth transactions.

Brick News Web – Community News Platform

- Engineered a dynamic, community-driven news platform allowing users to read, share, and interact with news content.
- Incorporated real-time updates, user comments, and voting mechanisms to foster engagement.
- Utilized scalable architecture and modern web frameworks to ensure fast loading and reliability.
